EXECUTIVE SUMMARY

Ghana Shared Growth and Development Agenda (GSGDA II) for the period 2014-2017 was prepared based on the economic development direction of the government policy which dowelled on seven (7) main thematic area. These were.

- Ensuring and Sustaining Macroeconomic Stability
- Enhancing Competitiveness in Ghana's Private Sector;
- Accelerated Agricultural Modernization and Sustainable Natural Resource Management;
- Oil and gas Development
- Infrastructure, Energy and Human Settlements;
- Human Development, Productivity and Employment and
- Transparent and Accountable Governance

The plan preparation process of this document (District Medium Term Development Plan 2018-2021) started with a review of the previous plan and interactions with stakeholder to enable them to identify and prioritize their needs. The planning team organized fora for all the Town/Area councils where the team interacted with Assembly-members, Area members, Chiefs and opinion leaders. The Town/Area council executives organized the participants and funding was provided by the District Assembly to cover their feeding, travelling and transport allowances. Community Action Plans (CAPs) were also reviewed and collated from Area Councils which were covered by the CBRDP training programme which generated useful inputs for the current plan. The District Planning Co-ordinating Unit (DPCU) has the District Planning Officer as its secretary collected and collated data from all the decentralized departments in the District as inputs for the District profile and current situation.

The prioritized needs were then harmonized with the problem and gaps identified in the previous medium term plan. In most cases the identified needs have strong relationships with the gaps and

were found relevant for its inclusion into the current plan. These needs and aspirations were then subjected to a litmus test to find out their relationship with the thematic areas of the GSGDA II.

The District goal, objectives and strategies were generated through stakeholders meetings. To make the planning process participatory, public hearing were organized to enable the citizenry have input in the plan and also own them. Public hearings were organized in all the five (5) area councils in the District. The following stakeholders participated in the public hearing; Assembly members, opinion leaders, chiefs, CBOs etc.

SCOPE AND DIRECTION

The vision of Ghana as contained in the long-term national development policy framework (LTNDPF, 2018-2057) is a "just, free, and prosperous nation with high levels of national income and broad based social development". The vision is to be accomplished through the formulation and implementation of ten 4-year medium-term development plans (MTDPs). The first of these plans is to be prepared based on the medium-term national development policy framework (MTNDPF, 2018 – 2021). The MTDPF (2018-2021) is the framework for the preparation of district and sector plans. This grouped under five (5) long term development goal. These are;

- Build an inclusive industrialised and resilient economy
- Create an equitable, healthy and disciplined society
- Build safe and well-planned communities while protecting the natural environment
- Build effective, efficient and dynamic institutions
- Strengthen Ghana's role in international affairs

CHAPTER ONE

PERFORMANCE REVIEW/DISTRICT PROFILE/CURRENT SITUATION/BASELINE

1.1 Introduction

This chapter reflects on the performance of the district in the implementation of the previous Medium Term Development Plan (2014-2017), the District Profile/Current situation of the Amenfi Central District. It also highlights the revenues and expenditures performance of the district as well as the challenges that confronted the district in the plan implementation process.

1.1.2 Vision Statement "To have a transparent and accountable governance system in all sectors of development for good and quality life for the citizenry"

1.1.3. Mission Statement

The Amenfi Central District Assembly exists to facilitate improvement in the quality of life of the people within its jurisdiction through equitable provision of services for the total development of the District.

1.1.4. Core Values

- Transparency and Accountability governance
- Hard work and High performance in the our delivery of service
- Opportunity for all including the vulnerable in the society

1.1.5. Functions

The functions of Amenfi Central District Assembly is derived from the ACT that establishes metropolitan/municipal/district Assemblies in the country i.e. Local government ACT 1993, Act 462 and L.I 2011 of 2011 that established the Amenfi District Assembly. The functions are:

- The District Assembly is responsible for the overall development of the district and shall ensure the preparation and submission of development plans and budgets to the appropriate authorities.
- Formulate and execute plans, programmes and strategies for effective mobilization of resources necessary for development

- Promote and support productive activity and social development
- Initiate programmes for development of basic infrastructure and provide services in the district.
- Responsible for the development, improvement and management of human settlement and the environment in the district.
- Responsible for the maintenance of security and public safety
- Initiate, sponsor or carry out such studies as may be necessary for the discharge of it functions

1.2 PERFORMANCE REVIEW OF THE DISTRICT MEDIUM TERM DEVELOPMENT PLAN (DMTDP 2014 – 2017)

The District Medium Term Development Plan (DMTDP, 2014-2017) was reviewed to ascertain the status of performance of the district in implementing the programmes and projects set to enhance the quality of life of the people in relation to (GSGDII).

Table 1. Performance of the District with respect to Objectives of DMTDP from 2014-2017

	ENHANCING COM	ENHANCING COMPETITIVENESS IN GHANA'S PRIVATE SECTOR									
	Policy Objective: Strengthen capacities of Artisans										
Period						Indicators					
	Programmes	Sub-programme	Broad project/activity	Baseline (2013)	MTDP Target	Achievement	Remarks				
2014				-	200	26 artisans from 6 communities were trained on financial management. 17 males and 9 females	implemented				
2015			Train 50 artisans in 10	26	200	56 artisans from 12 communities were trained 34 females and 22 males	implemented				
2016	Management and Administration	ement and Human Resource	communities annually on new technologies	82	200	41 artisans from 15 communities were trained on new technologies in the uses of bamboo. 13 females and 28 males	implemented				
2017				123	200	28 artisans from 8 communities were trained on new technologies in the uses of bamboo. 9 females and 19 males	fully implemented

2017	MANAGEMENT AND ADMINISTRATI ON	Planning, Budgeting and Coordination	Preparation of the Medium Term Development Plan for 2018-2021	-	1	DMTDP 2018-2021 in progress	On-going (20%)					

The programmes and projects implementation during the period had 56.6% fully implemented (completed), 4.3% implemented but not in the plan, 24.6% on-going, 14.5% were not implemented. The assembly was not able to execute all programmes and projects due to inadequate funds and supports from Central Government, Donors, NGOs and District Assembly Locally Generated Funds (IGF).

To achieve subsequent goals, there is the need for the Assembly to source adequate funds and supports from its development partners, show high commitment and improve its internally generated Funds which have been featured prominently in the 2017 – 2021 DMTDP. However, this can only be achieved through hardworking and commitment of the management of the District Assembly. The achievement of the goals and objectives specified lies nowhere but in hands of the management.

1.3 The Performance Status of other Interventions including Cross-Cutting Issues Implemented in the District from 2010 - 2013

The Amenfi Central District Assembly was supported in diverse way to execute significant number of interventions from central government, donors, private sector, NGOs and CBOs during the implementation of 2014 – 2017 DMTDP periods.

These includes: Child Labour especially in the Cocoa producing areas; HIV/AIDS; among others. The status of performance with regards to their impacts on the general improvement in the lives of the people and their implementation challenges have also been clearly outlined below.

1.3.1 The Implementation of Child Labour Programme in the District

The District being one of the rich cocoa growing areas in the country was identified to be one of the Cocoa Districts where children are engaged in the Worst Forms of Child Labour (WFCL). To curb this incidence or practice, the District was selected in 2008 among other Cocoa Districts to implement this programme under four (4) broad objectives to achieve in a selected communities in the district. These objectives include:

- 1. To set up Community Child Labour Monitors (CCLMs) and operational in at least ten (10) communities in the District by the end of the project.
- 2. To mobilize the Cocoa Growing Communities and Stakeholders to work together to eliminate the Worst Forms of Child Labour (WFCL) through awareness raising campaigns, Law enforcement, Networking and Community Participation.
- 3. To withdraw and rehabilitate children involved in the WFCL including trafficking and hazardous work.
- 4. To support the District Assembly (DLO/DSWO) and communities in implementing activities to eliminate the Worst Forms of Child Labour.

The International Labour Organization has equipped the District Labour Office with the needed facilities the programme in this district. Within the selected communities, the Community Child Protection Committees (CCPC) combed through the communities within their catchment areas and identified children aged between five (5) and seventeen (17) years who do not attend school but rather working in the cocoa farms and serving as domestic labourers. The children that are identified are referred to the CCPC Members for scrutiny to actually find out if they are clearly being denied of their educational rights. Those who are really found to be child labourers are however selected for the necessary support.

Some of the main achievements of the child labour programme since its implementation include:

- 1. CCPCs and Monitors formed and operational in all the fifteen (15) selected communities;
- 2. Community members are now co-operating with CCPCs to fight the incidence of child labour in their various communities:
- 3. Ten (64) children aged between fifteen (15) and seventeen (17) years involved in child labour were withdrawn and apprenticed in vocations while 107 children aged between five (5) and fourteen (14) years were also enrolled in school in 2014
- 4. During the second phase of the programme, 310 children aged between five (5) and seventeen (17) years have been identified by the CCPCs in all the fifteen (15) communities and enrolled in school and vacation by their parents and guardians; and
- 5. Children who never dreamt of going to school are now in school and show much interest in schooling.

The challenges confronted with the implementation of the policy in the district include;

- 1. Due to the acceptance of the programme, enrolment in most schools within the project communities are high and need urgent expansion in infrastructure.
- 2. Most school infrastructure is very bad and unattractive.
- 3. No incentive package for CCPCs and Monitors.
- 4. Lack of Identification Cards for CCPCs and Monitors.

The programme went to a closure in 2014 after a six (6) implementation period.

1.4 Financial Statement for the Amenfi Central District Assembly for the Period 2014 – 2017

1.4.1 All Revenue sources

The sources of revenue for Amenfi Central District Assembly are District Assembly Common Fund (DACF), District Development Fund (DDF), GoG,MPs common Fund, CIDA, Internal Generated Funds (IGF),Grants (Central Government Salary, Common Fund and Donor Intervention Fund) for the period 2014-2017. *Table 2*.

Source: Finance Dept. ACDA

The total estimated revenue for the district for the period under review (2014-2017) was Nineteen million, Ninety-four Thousand, Six Hundred and Thirty-one Ghana cedis Ninety-three pesewas (19,094,631.93) but Eight million, Seven hundred and sixty-two Thousand, Eight Hundred and Twenty-one Ghana cedis Ninety-nine pesewas (GHC 8,762,821.99) was received for all revenue sources.

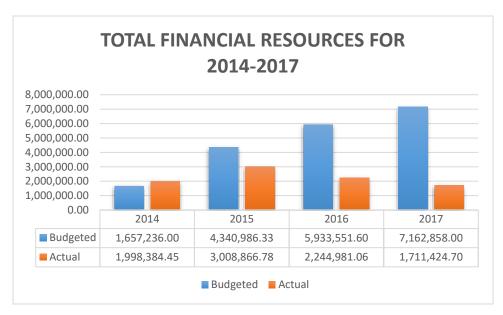

Figure 1. Total Financial resources for 2014-2017

The figure depicts that, the year 2014 recorded a 120% of amount total amount received as against the 65.31%, 37.84% and 24% for 2015, 2016 and 2017 respectively as against estimated budget amount for the period. *Figure 1*.

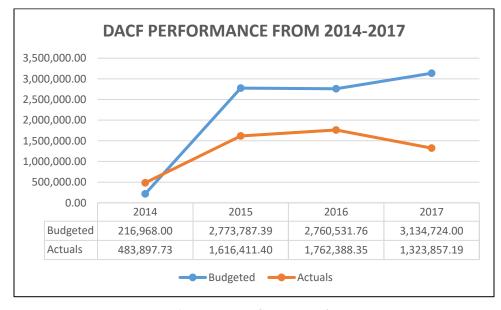

Figure 2. Total DACF Performance from 2014-2017

Figure above shows that, the year 2014 recorded a 223.03% which exceeded the estimate budget for the year. The other ensuing years recorded 58.27%, 63.84% and 42.23% for 2015, 2016 and 2017 respectively as against the budget estimates. The *Figure 2* above shows a steadily rise in the DACF performance from 2014, 2015 and 2016. Only 2014 actual releases was above the estimate budget.

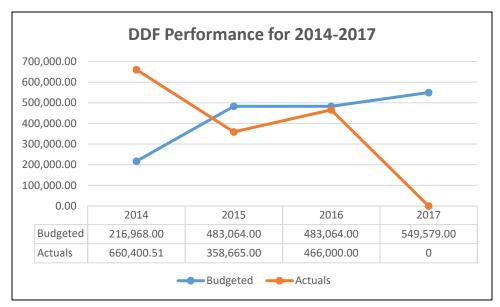

Figure 3. DDF Performance for 2014-2017

The figure depicts that, the year 2014 recorded a 304.38% of DDF amount total amount received as against the estimated budget for the year and 74.25%, 96.46% and 0% for 2015, 2016 and 2017 respectively years.

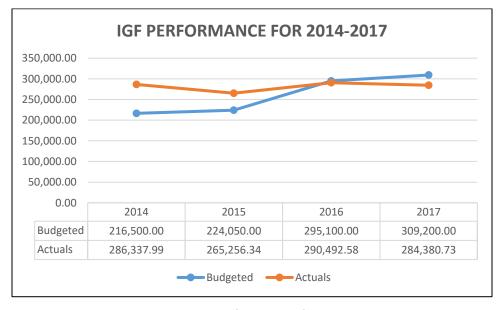

Figure 4. IGF performance for 2014-2017

Figure 4 shows that, 2014 and 2015 recorded a 132% and 118% respectively for the total amount received exceeded the estimated budget. In 2016 and 2017 the total amount received fell below the estimated budget that is 98.44% and 91.97% respectively.

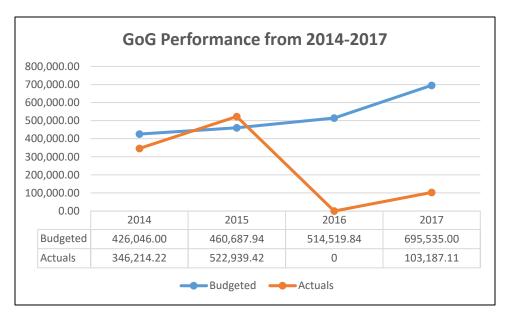

Figure 5. Total GoG performance from 2014-2017

The above figure shows that, the year 2015 recorded 113.51% which exceeded the estimated budget for the year. 2014, 2016 and 2017 fell below the estimated budget which were 81.26%, 0% and 14.83% respectively. Figure 5.

The District Assembly's effort to raise enough internally generated revenue is confronted with a number of challenges which include the following:

- ✓ Lack of comprehensive Revenue Database
- ✓ Lack of Continuous education on District Assembly Bye-Laws on taxes and
- ✓ Lack of enforcement of District Assembly Bye-Laws' provisions on defaulters.

1.5 Analysis of Existing Situation/Compilation of the District Profile

1.5.1 Institutional capacity needs

The capacity of individual members of the District Planning Coordinating Unit (DPCU) to perform their functions effectively and efficiently in a sustainable manner plays a major role in the formulation and implementation of DMTDP process in the district. In developing the district medium term development plan (DMTDP), it is essential to assess and review the District's capacity to develop and implement the plan. This goes beyond the provision of funds for the implementation but also, the personnel to assist in planning and conducting the monitoring and evaluation activities.

The key to an effective plan implementation is the existence of adequate human resource capacities to implement the plan. Therefore, these is the need for appropriate incentives, human and other resources available to be able to effectively monitoring during implementation stage of the District Medium Term Development Plan (DMTDP).

Table 4. Summary of results from the assessment of the capacity of the District.

ISSUE	CAPACITY MEASURE	OUTPUT INDICATORS	CAPACITY RATING (SCORE)	RECOMMENDATION
Required education for some staff inadequate	Qualification of personnel	Two (2) key staff improve standard of education	5	Offer scholarship to 2 key staff to purse required academic program at the tertiary level annually
Some key DPCU positions are not filled	Staff compliment	No Town Planning Officer posted	5	Lobby for the posting of Town Planning officer to the district.
Inadequate knowledge and skill of most staff	Skill and knowledge	Capacity of DPCU personnel's	1	- Equip DCPU members with training in the following areas;
in M&E and related discipline.		enhanced		Monitoring and evaluation.
				Project planning and management, Project proposal writing, Report writing
ISSUE	CAPACITY MEASURE	OUTPUT INDICATORS	CAPACITY RATING (SCORE)	RECOMMENDATION

Inadequate funds to meet basic DPCU operations	Availability of funds	Funds release on time for DPCU, M&E operations and related activities.	5	Commit DA to ensure release of funds to facilitate: a) Regular monitoring and inspection. b) Regular DPCU meetings. c) Capacity building programs. d) Payment of honorariums
ISSUE	CAPACITY MEASURE	OUTPUT INDICATORS	CAPACITY RATING (SCORE)	RECOMMENDATION
Unplanned resource utilization	Utilization of resources	Resources utilized as outlined in DMTDP	5	Impress upon management to utilize resources as budgeted in accordance with DMTDP to facilitate monitoring and evaluations
Release of funds behind schedule	Timely access to funds	Timely release of funds	5	Impress upon management to release funds on time for monitoring and evaluation activities on time
Management unable to handle all management functions	Management	Management equipped to handle all functions	5	Provide incentive and motivation packages to management to handle all functions related to planning, budgeting, M&E and community sensitization.
ISSUE	CAPACITY MEASURE	OUTPUT INDICATORS	CAPACITY RATING (SCORE)	RECOMMENDATION
Lack of motivation and incentives	Motivation/Incentives	Personnel's inadequately motivated	1	Institute motivation package for M&E personnel Access incentives in the form of training that exist in the various central government and development partners' agencies

Inadequate logistics	Equipment/facilities	Staff have access to appropriate logistics	5	Provision of 4x4 vehicle and motor bikes for monitoring and evaluation. Provision of furniture for DPCU office. Provision of computer and accessories for management of data.
ISSUE	CAPACITY MEASURE	OUTPUT INDICATORS	CAPACITY RATING (SCORE)	STRATEGY
Lack of coordination among departments disrupt DPCU meetings and activities	Leadership	Proper coordination in place	5	Coordinating Director to harmonies meetings of decentralized Departments in the district.
			42	

The capacity and management index $\underline{4.2}$. This means the district has a mediocre capacity and management performance

1.5.2 Physical Environment (Characteristics)

The physical and the natural environment are essential elements or factors that determine the socioeconomic factors of the district. This stems from the fact that apart from being potential resources, they also serve as framework within which all development activities take place. The major factors that need critical analysis and their implications for development in the district under physical and natural environment include location and size, climate, vegetation, relief and drainage, soil, geology and minerals, deforestation, mining and quarrying and natural disasters etc.

1.5.2.1 Location and Size

The Amenfi Central District is located in the middle part of the Western Region of the country. It is bounded to North by Bibiani-Ahwiaso Bekwai District; to the North-West by Sefwi Wiawso Municipal; to the South by Ellembelle and Nzema East Districts; to the South-East by Prestea Huni-Valley District; to the East by Amenfi East District and to the West by Amenfi West District.

It lies between latitudes 50 20'N and 70 10'N and longitudes 20 9'W and 20 27'W. It has estimated land area of 1,845.93 Square kilometres with 131 communities.

AMENFI CENTRAL DISTRICT IN REGIONAL CONTEXT Legend Amenfi central Sea WESTERN REGION

Map 1: Amenfi Central District in Regional Context

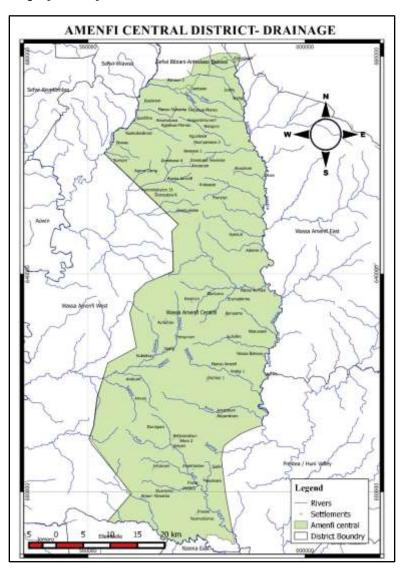

Source: DPCU, 2017.

1.5.2.2Topography & Drainage

The topography is generally undulating with summit averaging 153 meters (500ft). The nature of the drainage system is dendritic. Notable one being the Ankobra River. There are also some major streams like the Brayere, Kwini. Fure, Bakore and Samire to the south whiles Damiaye, Frein, Erane and Suraw also to the northern part of the district. These rivers and streams serves as major sources of water for domestic and farming (irrigation) purposes especially for vegetable farmers

in the dry season. Their volume reduces considerably during the dry season. Thus, many enclaves in the district suffer acute water shortage during the dry season. Notwithstanding this, the rivers and streams in the district contribute to socio-economic development of the district. However, the Small Scale Mining activities (Galamsey) in the district pollute these rivers. Rivers like Ankobra and Damiaye have being heavily affected by this activities therefore, making living difficult for inhabitants around these rivers. This pollution causes a lot of havoc to the people and retards the development of the district as a whole. In spite of the fact that the district gets considerable revenue from the mining activities, it causes more harm than good.

Map 2: Drainage Map of Amenfi Central District

Source: DPCU, 2017.

1.5.2.3 Climate

The district falls within the wettest parts of the country, with average annual rainfall ranging from 1500mm to 2200mm. The district experiences a bimodal rainy season; March to July and September to early December. Temperatures are generally high ranging from $26 \, \text{C} - 27 \, \text{C}$ (75 F - 83° F) during the year. August is the coolest month of the year and the maximum temperatures occur in March.

The district being one of the richest cocoa growing areas in the country is affected by this climate. The climate of the district is suitable for the growing of various crops, particularly both cash and food crops as stated earlier on. Nevertheless, the climate has put the district in an enviable position of being one of the leading producers of cocoa in the country. The good climatic condition provides high water table which is good for the drilling of boreholes and construction of hand-dug wells.

AMENFI CENTRAL DISTRICT-RAINFALL PARTTERN Legend Rainfall Pattern 1500-1600 1600-1700 1700-1800 1800-1900 1900-2000 2000-2100 2100-2200 District Boundaries

Map 3: Climate Map of Amenfi Central District

Source: DPCU, 2017.

1.5.2.4 Vegetation

The district falls within the high rain forest zone and has two (2) major types of vegetation cover. These are the moist semi-deciduous forest found in the northern part and the tropical rainforest found in the south where rainfall is heaviest. The district has four forest reserves covering a total area of 425.14 kilometre square. The table below shows the various forest reserves and their coverage area with stool names of traditional areas under whose jurisdiction the forest reserves fall.

Table 5. Forest Reserves in Amenfi Central District

	NAME	AREA (km²)	STOOL
1	Mamire Forest Reserve	45.33	Akyekyere
2	Fure Headwaters Forest Reserve	169.43	Amuni
3	Fure Headwaters Forest Reserve	105.51	Amuni/Msease Nsuta
4	Bura River Forest Reserve	104.87	Bremang/Ankasie/Achichire/ Aserewadi
	TOTAL	425.14	

Source: Forestry Services Division, Asankrangwa (2017).

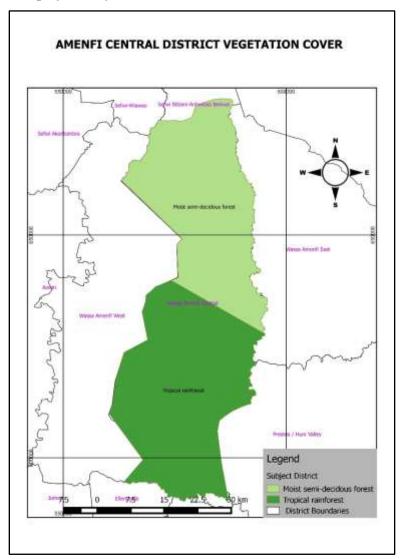

Some trees and plants in the forest have high medicinal value. The forest also protects water bodies such as rivers Fure and Samire which also drain the district.

The forest cover of the district is made up of closed forest (highly dense vegetation), moderately closed trees with herbs and bush cover, moderately dense herb/bush with scattered trees and the open forest with sparsely inhabited trees.

The various forests in the district also provide the necessary natural habitat and congenial atmosphere for different species of animals such as antelopes, deer, monkeys, birds, squirrels, snails and a host of other forest animal species which provide the source of meat to not only the inhabitants of the district but also those outside. The different species of animals also add to the beauty of the environment and as tourist attractions.

The forests contain many economic tree species like sapele, odum, mahogany, wawa etc. Most are exploited to feed the wood processing firms. Some are exported mostly to European countries. The forest cover in the district also makes it very difficult for agriculture mechanisation.

AMENFI CENTRAL DISTRICT- LAND COVER Legend

Map 5: Land Cover Map of Amenfi Central District

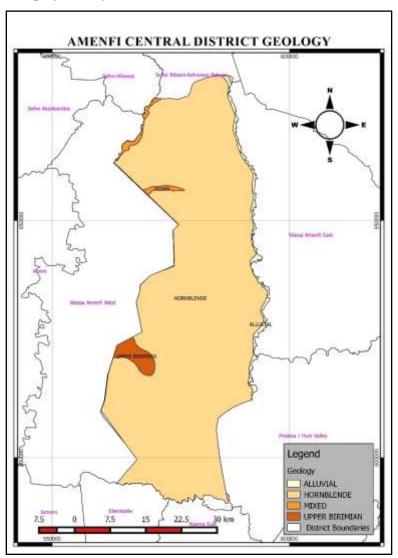

Source: DPCU, 2017.

1.5.2.5 **Geology**

The District lies geologically within the Ghanaian Shield area which consists of the lower Upper Birimian which situated at the south-western part of the district, the mixed rocky settlements in the north-western, he Alluvial which also stretches along the Ankobra River in the eastern portions of the district. The Hornblende form a major part of the district and cover about 1,877.41 km². It falls within the Asankrangwa-Manso-Nkwanta gold belt which is associated with the Birimian rocks.

The prevalence of large gold deposits in the district has led to the sprouting of mining activities within the district. Consequently, the district has the potential of generating revenue through taxation and royalties as well as creating employment for the inhabitants from the mineral deposits. Irrespective of the numerous benefits derived by the district from these mining activities, their negative repercussions on the environment have become worrisome. For instance, the Galamsey (illegal mining) in the district has destroyed vast tracts of arable land, forest reserves and polluted the water bodies in the district causing acute water shortage to a lot of communities.

Map 6: Geological Map of Amenfi Central District

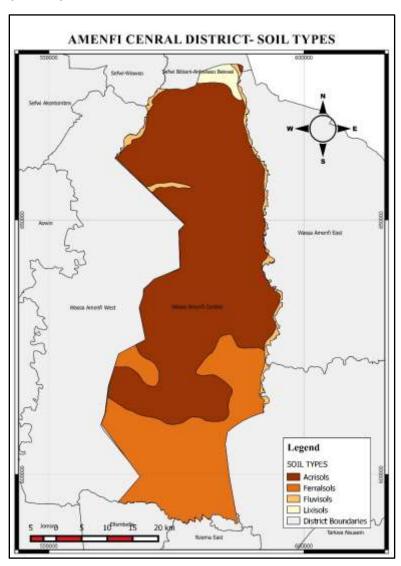

Source: DPCU, 2017.

1.5.2.6 Soil Types

The geological soil formations identified in the district is associated with the Birimian rocks and Hornblende. There are also two main agricultural soil types identified. These are the forest Acrisols and Ferralsols. The Fluvisols which is located along the banks of Ankobra River and the Suraw rivers. The Lixisols is also found at the Upper wassa forest reserve.

These soils supports the cultivation of cash tree crops like coffee, oil palm, rubber, cola and cocoa. Food crops like plantain, cassava, maize, rice, tomatoes, pepper and garden eggs are also cultivated. Large enclaves of clay deposits are also available for exploitation. For example it could be exploited for the brick and tile industry.

Map 7: Soil Map of Amenfi Central District

Source: DPCU, 2017.

1.5.3 Biodiversity, Climate Change, Green Economy and Environment

The activities of illegal mining, chainsaw operation, rampant bushes and poor application of agro technologies in the district is immensely affecting the environment around us. This activities have affected the rainfall pattern in the district. The district assembly through the forest service division embarked on several tree planting programmes as well as the formation of Community Resource Management Areas (CREMAs) in the communities in and around the Amuni-Sureso and fure forest reverses.

1.5.4 Natural and Made-Made Disaster

The district through its NADMO office have identified area such Manso Amenfi, Nkakaa, Sraha and Ahiem to be prone to disaster such as floods and are working hard through public sensitisation on methods of flood prevention. Some manmade activities such Water pollution by small scale mining activities, poor application of fertilizers, Indiscriminate bush burning, poor waste disposal (both solid and liquid wastes) are also being addressed.

Challenges

- Disaster volunteer groups have become dormant.
- Lack of logistics to carry out regular monitoring of zones.
- Poor road network
- Lack of working tools such as boots, cutlasses, shovels, rakes, pick axes and protective material for both staff and other stakeholders such as disaster volunteer groups

1.5.5 Natural Resource utilisation

The natural resources in the Amenfi Central District such farm lands, Forest reserves and water bodies are being destroyed by the illegal miners to extract gold (GALAMSEY) using the dig and wash approach along the river bodies e.g. Ankobra River. The operation of chain saw operators to the forest reserves (Mamire Forest Reserve, Fure Headwaters Forest Reserve, and Bura River Forest Reserve) has a negative turn on the natural resources in the district.

The district assembly has put in measures to help in the effective utilisation of the natural resources in the district. The formation of district task force to monitor the activities of illegal mining activities and chain saw operations and to prosecute perpetuators who violated the laws. The environmental Protection Agency and forestry commission should establish an office in the district for ensure regular monitoring of these resources.

Challenges

- Lack of technical know-how of the citizenry in the use of the resource
- Lack of sensitization for the citizenry on effect utilization of the natural resource
- Inadequate and logistic for monitoring the activities of user of the resources

1.5.6.1 Water Security

The main sources of drinking water in the district include small town water system, boreholes, hand dug wells, streams and rivers. In many cases, the rivers and streams are polluted by the activities of the galamsey operators. This has led to an acute water shortage in communities that solely depend on these rivers and streams as their source of water. The situation is further aggravated during the dry season where most of the stream and hand well get dried up.

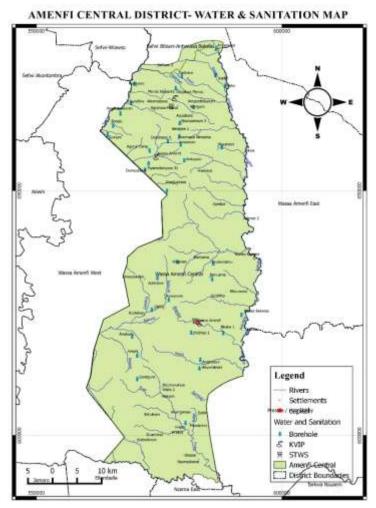

In an attempt to arrest the situation, the Amenfi Central District Assembly in collaboration with the Community Water and Sanitation Agency (CWSA) has drilled/constructed 10 borehole in 10 communities in 2015 and 1 one town water supply system in the district under the Sustainable Rural Water and Sanitation Project (SRWSP) and 16 boreholes under the chines project in 2016. Additionally, the District Assembly has embarked on a project to rehabilitate all broken down boreholes in the district in 2015. At the moment, the district assembly through the DACF is drilling 10 more boreholes in 10 different location in the district a number of .This is to ensure sustainability in the provision of portable water district wide. In all there are about 170 boreholes distributed across the district.

The district assembly is making countless efforts to improve the water coverage in the district, but the activities of illegal mining activities is negatively affecting the water resources in the district. Their activities have rendered the Ankobra River and some small rivers in the district which are major sources of drinking water and for agricultural use unwholesome due to its high turbidity and poisonous chemical content e.g. Cyanide and mercury in the river.

1.5.6.2 Sanitation

Majority of households in the district depend on pit latrines (48.8%) and public toilet (WC, KVIP or pan) (37.3%). However, 8.6% of households have no toilet facilities and depend on the bush to ease themselves. Few households have access to WC (1.1%) in the district. The main toilet facilities used in urban households are Public toilet (40.8%) and pit latrine (35.4%); whereas more than half of rural households use pit latrines (51.2%). the district is making efforts to sensitise is citizen to promote household latrines to ensure good hygiene practices in the district. 68.9 percent of the households dispose solid waste in a public dump. Households who dump indiscriminately form (19.1%). Only 1.9% of solid waste generated is collected by district authorities. Majority of rural household dwellers throw their liquid waste onto the compound.

Map 8: Water and Sanitation Map of Amenfi Central District

Source: DPCU, 2017.

Challenges

- High level of ion in the some parts of the terrain
- Poor managements of water resources in the district
- Lack of logistic for monitoring of these natural resources

1.5.7 Population Characteristics

The population characteristics of every geographical area are very essential and plays a major role in the planning and budgeting of resources to efficient utilization of resources for development. The population characteristics like age distribution, growth rate, dependency ratio, population density and migration patterns of people are critical for allocation of resources in the district.

Table 6. Projected Population Size

Amaa		Population Size)	Area size	Population
Area	2010	2017	2021	(KM ²)	Density
Ghana	24,658,823	28,925,824	31,687,895	238, 533	121
Western	2,376,021	2,733,075	2,960,705	23,921	114
Amenfi central 69,014 District		82,212	90,858	1,845.93	45

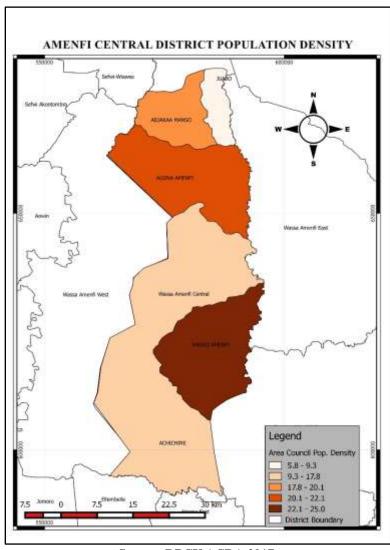

Source: DPCU Construct, 2017

1.5.7.1 Population Size and Growth rate

The current population of Amenfi Central District is projected at 82,212 an at growth rate of 2.5% per annum with 2010 population as the base. The Population is made up of 48% female and 52% male. The growth rate is useful in allocation of resources. Comparatively the Amenfi Central growth rate is higher than the regional rate of 2.0 % and a par with the national rate of 2.5 %. The District has fertility rate of 3.7 as against 3.6 for the region.

1.5.7.2 Population Density

The concentration of people in the major town are much greater than the rural setting. Manso Amenfi area council has the highest population density of 25 persons per km2 due to the high population of people in the capital, Nkakaa and Hiawa while Juabo recorded least among the five (5) area councils with 9 persons per each km² as shown in the figure below.

Map 9: Population Density Map of Amenfi Central District

Source: DPCU,ACDA 2017.

1.5.7.3 Age-Sex Structure

Table 1.5 shows that 42.6 percent of the population in the district falls within the 0-14 age group, 54.1 percent falls in the 15-64 age group and 3.4 percent falls in the 65+ age group. This distribution depicts that of a youthful population which is a common characteristic of a developing country. Figure 1.5 shows the population pyramid of Amenfi Central District which clearly brings out the picture of the district's youthful population by depicting a broad base with a narrow top. The age structure demands for the provision of more schools especially at the basic and secondary levels.

The population of the district is male dominated (52%) as against the female. It has a sex ratio of 108.2. This deviates from the national figure which presents a sex ratio of 95.2 and the regional figure which gives a sex ratio of 100. This development could be as a result of the male dominated mining activities in the district and the resultant migration of male youth from other parts of the country to partake in the business.

Furthermore, Table 1.5 indicates the dependency ratio of the district. From the Table, the overall dependency ratio for the district is 85.0. The dependency ratio for males is 85.2 while that of females is 84.8.

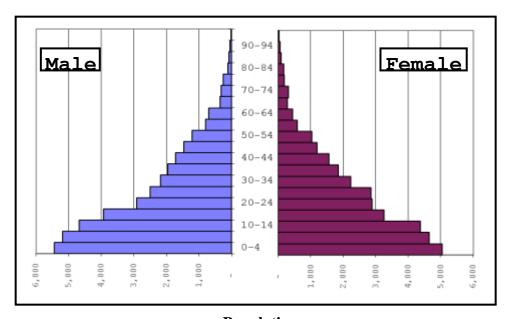

Table 7. Population by Age and Sex

Figure 6: Population Pyramid of Amenfi Central District

Population

Source: Ghana Statistical Service, 2010 Population and Housing Census.

1.5.8 Migration

Thirty percent (30%) of Amenfi central population are migrants. 22.7 percent of the migrants in the district were born in other localities within the region. For other migrants form other regions, Ashanti region forms the majority. These are also a small number of foreign national residing in the district, these are mostly chines, Indians and Ivory Coast national.

1.5.9 Gender Analysis

The 2010 population census shows that males in the Amenfi Central District are more than that of the females. The male population forms 52. % of the total population of the district whiles that of the female is 48 %.

1.5.9.1 Societal Role of Gender

Women play a major role in the society but most at times they discriminated up on when it comes to decision making. They seek the welfare of the family, from preparation of meals to fetching of water. In the District where water coverage is low, women/girls have to walk a long distance in search of water. This affects the girl child's education as most of them have to walk a long distance to look for water before attending school.

1.5.9.2 Socio-Economic Role

Women play important role in the development of rural economy. In the district, women are involved in the following economic activities; Trading, Soap making, farming among others.

They also provide services such as hairdressing and dressmaking. However, they are faced with numerous challenges. Most of the female farmers do not own land hence the size of the farms are small, this has result in female farmers producing on subsistence basis. Another challenge hindering their economic empowerment is limited access to credit. This is due to women not owning property which could be used as collateral. They also lack adequate technical skills to undertake their trade.

The poor accessibility to health facilities due to inadequate health infrastructure and the poor nature of roads in the district affects the women more than the men. This has resulted in increased maternal mortality.

1.5.9.3 Political Situation

The district assembly is the highest political decision making body at the local level. However, during the 2015 district level elections, only two (2) women were elected out of the twenty-three (23) electoral arrears in the district. This is mainly due to the traditional belief that when it comes to the governance and decision making women have no place. Another reason is the low literacy rate of women.

1.5.10 Settlement system

1.5.10.1 Rural – Urban Split

Ghana as a country has more urban than rural with 51% of the population living in the urban areas; whiles 49% lives in the rural areas. The Amenfi Central District is predominately a rural district. The 2010 PHC indicate that 59% of the population lives in the rural areas whiles 41% are in the urban centres. Amenfi Central District has only four communities with population above 5,000 to be classified as urban. The communities are Manso Amenfi, Agona Amenfi, Adjakaa Manso and Hiawa.

1.5.10.2 Housing Size, Composition and Structure

The district has a housing hold population of 67,608 with a total number of 14,207 households. The average household size in the district is 4.9 persons per house. Children constitute the largest proportion of the household structure. Spouses from 12.4 percent of house population. Nuclear household constitute 42.1% of the total number of households in the district.

1.5.10.3 Type of dwelling, tenancy arrangement and ownership of dwelling units

Separate or standalone houses form the majority (56.5%) of all dwelling units in the District and out which 26.2 percent are separate houses and 30.3 percent are semi-detached houses. Almost eight out of every ten dwelling units in the District are owned by members of the household; 7.8 percent are owned by relatives who are not household members; 7.4 percent are owned by other private individuals and 0.7 percent are owned by the public/government. Less than one percent (0.5%) of the dwelling units is owned through mortgage schemes.

1.5.10.4 Roads Network

Like most districts in the Western Region, the Amenfi Central District has only a few kilometers of tarred roads while over 90.8% are not tarred. The total length of road network is about 650.5 km out of which 55.5 km are bitumen surfaced whiles 595 km are feeder roads which equitably spread throughout the district. A total of 265km out feeder roads in the district are engineered, 108 are partially engineered whiles 200km are outengineered roads.

The district is greatly handicapped by its poor road network and quality. The poor nature of the roads has adversely affected the delivery of services to the entire district. The problem is further aggravated during the rainy season. This has become a major setback in the carting of agricultural products to the markets in the district and other towns outside the district. It also affect the social services delivery in the district due to poor nature of roads linking the individual communities.

District Bounds

1.5.10.5 Hierarchy of settlements

The hierarchy of settlements in the District was distinguished by calculating the centrality index of each of the selected settlements as a percentage of the total weighted centrality index as illustrated in the figure. The Scalogram Analysis depicts the various facilities that are available in the District.

1.5.10.6 SCALOGRAM ANALYSIS

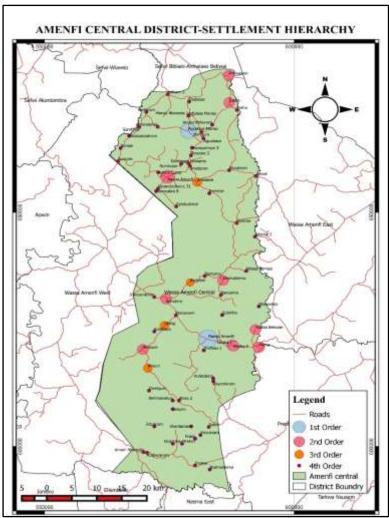

The scalogram is a graphic device that is illustrated in the form of matrix chart to show the distribution of functions of all selected settlements in a locality or district by their frequency of presence or absence. The scalogram gives a good impression about the functions that settlements perform in a particular locality or District. This assists in the determination of which settlements lack which services or facilities.

Map 11: Settlement Hierarchy

Source: DPCU, 2017.

1.5.11 Cultural Structure

1.5.11.1 Ethnicity

Wassa is the dominant ethnic group in the district. However, there are other minor ethnic groups such as Nzemas, Sefwis, Asantes and Akyems. The Wassas are culturally homogeneous with respect to lineage, inheritance and succession. Like other Akan settlements, inheritance is through matrilineal lineage. Funerals, chieftaincy and marriage rites are also purely of Akan origins. The language spoken by the people in the district is predominately Twi.

1.5.11.2 Chieftaincy

The institution of chieftaincy is an important component of the social organization of the district as in the rest of the country.

The Amenfi Central District has a number of divisional chiefs who pay homage to the Paramount Chief (Omanhene) of the Wassa Amenfi Traditional Area at Wassa Akropong. Under the traditional setup, the Omanhene is the head of the Traditional Council. In all, there are about forty-five divisional chiefs under the Omanhene.

1.5.11.3 Festivals

The major Festival of the people in the district is the Yam Festival, which is celebrated annually between March and April to herald the harvest of the water yam. It is celebrated to offer thanks to the gods for bumper harvest and for protection throughout the year.

1.5.11.4 Religious Affiliation

The 1992 Constitution allows for freedom of worship; thus all persons have the right to join or not to join any religious organisation of their choice. Table 4.1 and Figure 4.1 give data on population by religion and sex. The table shows clearly that majority of persons (82%) enumerated in the district are Christians (Catholic; Protestant (Anglican Lutheran etc.); Pentecostal/Charismatic; and other Christians).

The highest is Protestant (Anglican Lutheran etc.) (23.8%), followed by Pentecostal/Charismatic (23.7%) with Catholics constituting 19.1 percent. Those practising Islam are 10.1 percent while those with no religious affiliation constitute 5.2 percent of the district population. The least religious group is traditional religion which accounts for 0.8 percent of the religious groups. The data show that more males (35,866) are affiliated to religious bodies than females (33,148).

1.5.13 Governance

1.5.13.1 Political and Administrative Structure

In accordance with the Local Government Act, 1993 (Act 462), the District Assembly is the highest political and administrative body of the District. The District Chief Executive (DCE) and the District Coordinating Director (DCD) are the political and administrative heads of the district respectively. The General Assembly is chaired by an elected presiding member. The Assembly is made up of 32 Assembly Members of whom 21 are elected by voting and 11 are

appointed by the President in consultation with the traditional authorities and other interest groups in the district.

The Amenfi Central District Assembly has Five (5) Area Councils, namely; Manso Amenfi, Juabo, Adjakaa-Manso, Achichire and Agona-Amenfi which are all in good standing and contribute to the development of the District by helping in the generation of internal revenue. The Assembly has an Executive Committee (EC) which is chaired by the District Chief Executive. The District has 11 Decentralised Department which contribute to the smooth running of the District. There are five statutory sub-committees which help the EC carry out its functions. These are:

- Finance and Administration
- Development Planning
- Works
- Social Services
- Justice and Security

The District Assembly has other two subcommittees in addition to the statutory five subcommittees. These are the Environmental and Micro Scale Enterprises Subcommittees. The EC is made up of chairpersons of the subcommittees. There are other committees which perform advisory roles and are also critical to the efficient performance of the functions of the EC. These include the District Tender Committee, the District Education Oversight Committee, Public Relations and Complaints Committee and the District Security Committee (DISEC). The DISEC is chaired by the DCE.

Day to day administration of the district is performed by the Central Administration (Secretariat of the District Assembly) with technical support from the 11 decentralized departments.

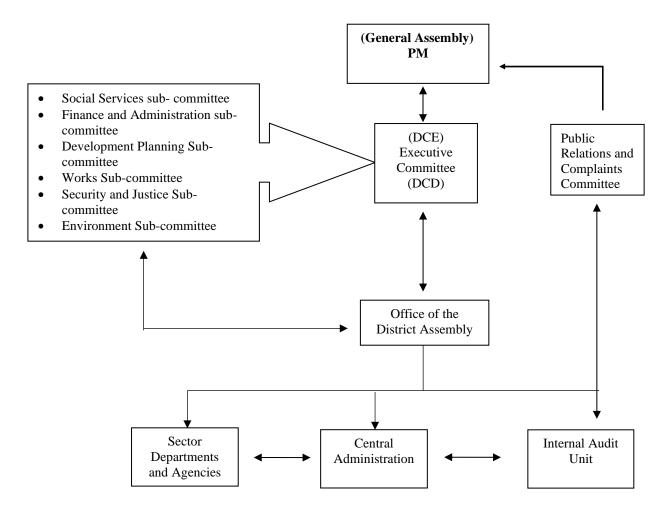

1.5.12.2 The Departments of the Assembly

Amenfi west District Assembly is mandated by the Local Government (department of district assemblies) (Commencement) Instrument, 2009 (LI 1961) to establish 11 decentralised as department of the Municipal Assembly, this was achieve by reconstitution of the 22 decentralised departments under the section 161 (1) of the local Government Act, 1993, Act 462 through series of mergers. With the enactment of the LI 1961 the District Assembly is enjoined to establish the following eleven (11) departments. Out of

I. Central Administration Department

- II. Works Department
- III. Department of Agriculture
- IV. Department of Social Welfare and Community Development
- V. Feeder Roads Department
- VI. Ghana Health Service
- VII. Ghana Education Service

1.5.12.3 Human Resource of the Assembly

The Human Resource of the Assembly is a key factor in the development of the district. The availability of the required number of staff with the relevant qualification and competence will ensure efficient implementation of policies, programmes and projects in the district.

1.5.12.4 Capacity of the Sub-district Structures

The Urban, Town and Area Councils in the district have well composed elected representatives of the people. The appointment of a Secretary to perform administrative function has been a challenge due to the high qualification grade (Diploma in Public Admin.) required to filling that position. In addition, the Assembly is required by law to pay the salaries of the secretaries it recruits for its sub-structures. With the current level of internally generated revenue the Assembly cannot commit itself to paying salaries of the Secretaries that will be commensurate to offers in other public institutions for such qualification.

Alternatively, the Assembly has been experimenting with the use of national service persons in one of the area councils to see the outcome for informed decision on the issue. The sub-district structures are not able to perform their mandate as spelt out in the Local Government Act. They are unable to organize regular meetings due to unavailability of funds and are also not actively involved in revenue mobilization and therefore do not get the needed funds to implement their own programmes; thus still looking up to the Assembly to solve all local problems. Hence, governance at the district level is still centralized with the grassroots still excluded in the governance process

1.5.13 Security

For the Amenfi Central Assembly to attract investment and promote rapid development there is the need to have a peace and safe environment, where crime rate is low and there is protection for life (people) and property. The District Security Committee (DISEC) with the District Chief Executive being chairman has the mandate to oversee the overall security issues in the District. The district has no police headquarter therefore, the Amenfi west district command takes charge of the district. The police citizen ratio is 1:3451 which very alarming because only Manso Amenfi, Agona Amenfi, Adjakaa Manso, Juabo and Sumpre are the only towns with police stations. Therefore the need for more police personnel in the district as well as establishment of more police stations.

Challenges

- Lack of police headquarters and accommodation for security personnel
- Inadequate police personnel in the district
- Lack of logistic for police personnel

1.5.14 District Economy

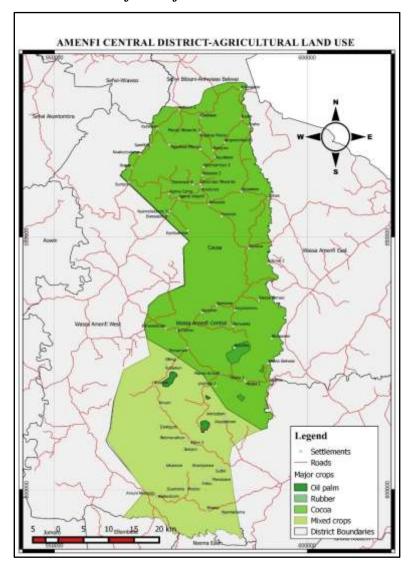

1.5.14.1 Agriculture

Agriculture is the main economic activity in the district. The sector employs majority (77.4%) of the economically active labour force, followed by the Services Sector (6.7%) 25,556 household are engaged in agriculture in the district (GSS, 2010 PHC). Cash crops grown are mostly cocoa, oil palm and rubber. Major food crops produced include cassava, plantain, maize, rice, garden eggs and tomatoes. Food crop production is generally on subsistence basis with output per yield substantially low. This is due to the use of old and traditional methods of farming predominated by the use of cutlasses and hoes with little mechanization. Land acquisition is mostly on leasehold basis. The farmers use mostly traditional methods of farming such as slash and burn, bush fallowing and shifting cultivation.

The farmers face a number of challenges such as poor road network which makes it difficult to transport farm produce to the market centres, inadequate or lack of storage facilities, poor market structures and inadequate farming inputs such as fertilizers, seedlings etc. There is also the problem of low level of adaptation to new technology in crop production by the farmers.

In other to improve the living standards of farmers and to increase their income levels, there is the need to diversify the activities of farmers by introducing and promoting alternate livelihood programmes such as beekeeping, glasscutter rearing, poultry rearing etc.

The District also has a potential to develop Agro-Based Industries. The availability of oil palm and cocoa husk can serve as raw material for the production of palm oil and potash for the manufacturing of soap.

Map 13: Agricultural Land Use of Amenfi Central District

Source: DPCU, 2017.

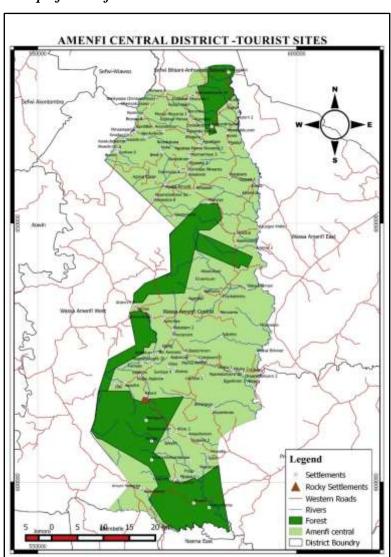

1.5.14.2 Trade, Industry and Commerce

The industrial sector is made up of few agro-processing facilities such as gari, oil palm, cassava and wood processing (S.M.S Company L.T.D). The commercial sector deals in trading of manufactured goods like detergents, cutlasses, agro chemicals, cosmetics and foodstuffs like plantain, cassava, cocoyam and palm oil. The services sector provides services such as teaching, transportation, hospitality and health. The district can also boast of a number of artisans such as masons, auto mechanics, dressmakers and carpenters. The large deposits of gold has resulted in the springing up of a number of small scale mining activities, heavy equipment renting and gold merchandise in the district.

There are three rural banks which provide banking and other financial services to the people. These are Amenfiman, Lower Amenfi and Fiaseman Rural Banks. There is a huge potential for the banking industry in the district since most communities do not have any formal banking institutions.

1.5.14.3 Tourism

The district has some tourism potentials which can be harnessed to create employment and generate revenue for the District Assembly. Communities with such notable tourist attraction sites include Abira and Amuni. Abira has rocks naturally carved in the form of a human being, while Amuni also has a group of rocks naturally carved in the form of a village settlement with huts. This site are very interesting and when resources are directed towards the development of the place, it would go a long way to boost the tourism sector in the district.

Map 14: Tourism Map of Amenfi Central District

Source: DPCU, 2017.

1.5.14.4 Mining

The District has large gold reserves due to the nature of the rocks. There are a number of licensed small scale mining companies working in the district together with hundreds of galamsey operators (even though illegal).

The mining industry has contributed immensely to the district economy. This is evident in the number of jobs that it has created for the youth who are engaged in various levels of gold mining. There are many small scale enterprises that are involved in gold merchandise and these have given employment to a number of people both directly and indirectly. It must be noted that gold exploration goes hand in hand with other services such as heavy equipment (excavators and bulldozers) renting. This serves as a source of income to the machine owners, operators and mechanics of such heavy equipment. The activities of these mining firms have generated substantial revenue to the District Assembly.

1.5.14.5 Energy

The District Analytical Report of the 2010 Population and Housing Census indicates that 39.7% of households in the district are connected to electricity from the public mains. Electricity Supply to the district is often erratic and frequent power outages are not uncommon. The district capital, Manso Amenfi and some other major communities have been connected to the national grid. However, a considerable number of communities are yet to be connected to the national grid. In spite of the promotion of liquefied petroleum gas as a better source of fuel for cooking, wood (79.7%) and charcoal (13.6%) are the dominant sources of fuel for cooking by households in the district. Only 2.2 percent of households use gas as their source of fuel for cooking (GSS, 2010 PHC). The district has no LPG station. This compels users of LPG to go to Asankrangwa in the Amenfi West District to purchase the product.

The government, through the Rural Electrification Project have enrolled about 65 new communities in the district to the national grid in and major expansion works on the existing lines in the major communities.

The overreliance on the wood and charcoal as major sources of fuel for domestic activities has led to the prevalence of deforestation in the District.

Map 15: Electricity Connectivity Map of Amenfi Central District

Source: DPCU, 2017.

1.5.15 Information and Communication Technology

Information and Communication Technology (ICT) has been defined to include the full range of electronic technologies and techniques used to manage information and knowledge. It is important to note that the use of ICT has been integrated into virtually every facet of commerce, education, governance and civic activity in developed countries and has become a critical factor in creating wealth worldwide.

1.5.15.1Ownership of Mobile Phones

Table 1.8 presents information on population 12 years and older by mobile phone ownership, internet facility usage, and sex as captured in the 2010 Population and Housing Census. The Table indicates that, out of a total of 44, 749 people who are 12 years and above, 10, 935 of

them own mobile phones. The male sex dominates in the ownership of mobile phones (64.5%) as compared to females (35.5%).

Five out of the six telecommunication networks have coverage in certain parts of the district. These are, Airtel, MTN, Tigo, Vodafone and Kasapa. Most of the communities in the district are in the rural areas with very poor telecom networks. Only the District capital and some major towns can boast of full network coverage. This has a negative impact on security and economic development of the district.

1.5.15.2 Use of Internet

A total of 431 people aged 12 years and above use internet services in the district. Out of this figure, 78.4 percent are males while 21.6 percent are females. The wide margin in the percentages could be attributed to the male dominance in the technological world as compared to the female.

Table 11: Population 12 years and older by mobile phone ownership, internet facility usage, and Sex

Population 12 years and older			Population ha	0	Population using internet facility	
I C T Indicators	Number	Percent	Number Percent		Number	Percent
Total	44,749	100.0	10,935	100.0	431	100.0
Male	23,159	51.8	7,055	64.5	338	78.4
Female	21,590	48.2	3,880	35.5	93	21.6

Source: Ghana Statistical Service, 2010 Population and Housing Census.

Challenges

- Low internet coverage in the district
- Low ICT device for basic schools in the district

1.5.16 Social Services

1.5.16.1 Introduction

Social services can be referred to as a range of public services provided by any national or regional government to improve the living standards of its citizens and include healthcare, education, public housing etc.

1.5.16.2 Health

The district has no District Health Directorate; hence, the Amenfi West District Health Directorate takes oversight responsibility of the Amenfi Central District. The district has six health sub-districts namely Manso Amenfi, Adjakaa Manso and Anyinabrim Sub-Districts with the District5 health facilities comprising of Health Centres, CHPS compound and Clinics. Below is the distribution of health facilities in the district in accordance with the various sub-districts.

Map 16: Health Facilities Map of Amenfi Central District

1.5.16.3 Challenges

The health sector like many sectors of the economy is faced with many challenges. This has negatively affected the quality of healthcare in the District. These problems include the following;

- Delay In Re-Imbursement By NHIA
- Inadequate staff Midwives, Enrolled nurses, Community Health Nurses etc
- Deplorable health infrastructure
- Low Community Involvement and participation in health delivery
- Lack of office and residential accommodation for District Health Directorate staff
- Inadequate logistics

1.5.16.4 Education

It has been reiterated on various platforms that education is the key to development. As a result, the Government of Ghana, through various interventions has relentlessly promoted education in the country. Some of these interventions include the school feeding programme, the one laptop per child project and the free school uniform project. It is an undisputable fact that enrolment in various schools has improved significantly as a result of these interventions.

Despite the above interventions by the central government, Amenfi Central District still has a significant number of its population being illiterate. According to the 2010 Population and Housing Census, out of the total population of 46,201 people who are 11 years and above, 13,860 (representing 30%) are illiterate. This can be attributed to many factors. Notably amongst them are the following:

- > Inadequate and dilapidated educational infrastructure.
- ➤ Limited number of qualified/professional teachers creating room for non-professional teachers to teach in their place.
- > Inadequate logistics to support educational delivery.
- > Inadequate furniture for the pupils.
- ➤ Higher school dropout rate among the girl-child in basic schools.

1.5.16.5 Number of Schools in the District

The district has 141 Kindergarten schools made up of 94 public schools and 47 private schools. Out of the 134 Primary schools in the district, 94 are public schools while 40 are private. The

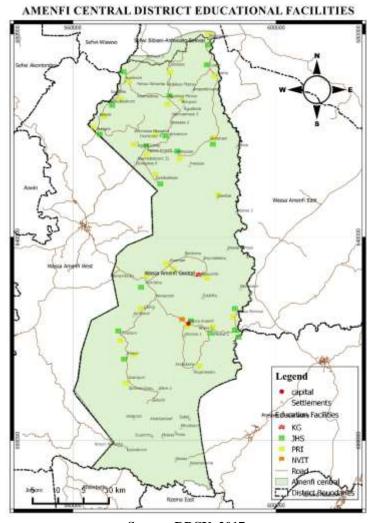

only vocational school in the district is the National Vocational Training Institute (NVTI) at Manso Amenfi. The breakdown of number of schools in terms of Public and Private schools is shown in the Table 8 below.

Table 13: Number of Schools, 2016/2017 Academic Year

1.5.16.6 Enrolment in Schools

Table 14. Shows enrolment in schools in the district for the 2016/2017 academic year. The Table indicates that there are 8,366 pupils in kindergarten, 18,868 pupils in primary, and 5,666 pupils in junior high school while 386 students are in technical/vocational school. The district has no senior high school hence there is no record of students in that level. The Table again depicts a pyramid trend; many pupils are found at the base of the educational structure. However, as they progress to higher levels, the student population reduces.

Table 14: Enrolment in Schools, 2016/2017 Academic Year

		PUBLIC			PRIVATE		TOTAL

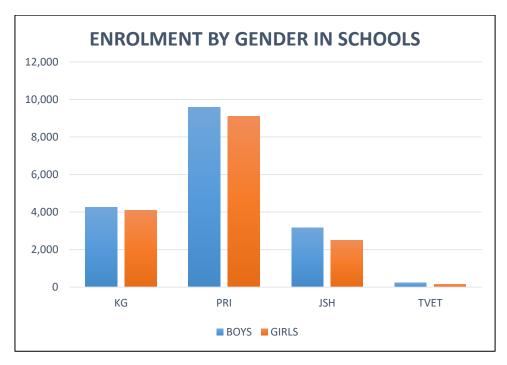

Figure 9. Enrolment by Gender in schools

1.5.16.7 Staffing in Schools

Table 10. Shows the staffing in the various educational levels in the District. According to the Table, there are more untrained teachers (152) in the public kindergartens than trained teachers (41). Trained teachers in public primary schools are 246 while the untrained ones are 268. The

public junior high schools however have 150 trained teachers as compared to 131 untrained teachers.

The dominance of untrained teachers in almost all levels of the educational structure indicates that the district is in need of trained teachers. This also implies that most trained teachers do not accept posting to many of the communities in the district and therefore refuse to report. This phenomenon is attributable to the rural nature of most communities in the District.

Table 15: Staffing, 2016/2017 Academic Year

1.5.16.8 Trends in learning Achievements

In 2013, the district registered 1447 candidates whereas the 2014 a total of number was increased by 4.7% (1515) candidates. 2015 and 2016 also saw a rise of 5.3% and 12% respectively in terms of student registering for the BECE exams. Out of the 4 year period, 2015 recorded the highest number of absentees. The district recorded its highest BECE performance in 2016 with a percentage of 91%.

Table 16. Trend of BECE Performance

Year	No. Of	No. Of	Agg	Agg	Total	Total	Percentage
	Candidates	Absentees	07-30	16-30	Pass	Failed	Passed
	Registered				06-30

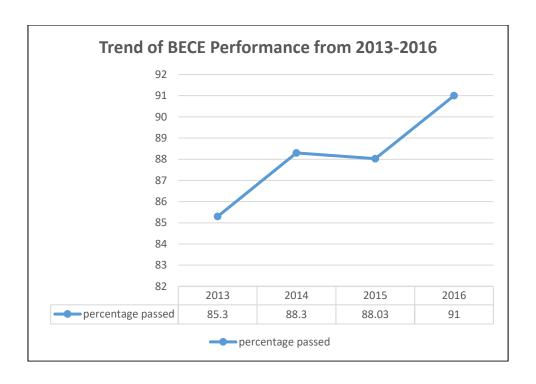

Figure 10. The trend of BECE Performance from 2013-2016

1.5.16.9 Challenges

- Insufficient storage facilities such as cupboards
- Inadequate textbooks for teaching and learning
- Lack of portable drinking water in schools
- Inadequate trained teachers
- Poor infrastructure in schools

1.5.17 Vulnerability Analysis

1.5.17.1 Introduction

Concerns about social protection, and in particular, vulnerability and social exclusion has increased in Ghana and Amenfi Central District is no exception. Experiences of vulnerability and exclusion are invariably, intrinsically linked to poverty in the district. It is clear that such condition also emanates from denial of rights and entitlements, on account of gender and age discrimination, ethnic politics, unstable environments and disability among others. In most cases, women and children are the most vulnerable in society. Current indicators of vulnerability in the District include: Child Labour, People Living with HIV/AIDS and People with Disabilities.

1.5.17.2 Child Labour

There are many cases of child labour in the District. This is due to the brisk business in cocoa farming and mining activities. In communities such as Hiawa, Nkakaa, Agona Amenfi and Adjakaa Manso where small scale mining (galamsey) thrives most, many children of school going age are found engaged in this activity. Other communities with high level of child labour cases include Adidaase, Antobam, Kyekyeso and Obeng.

The International Labour Organisation, through the International Cocoa Initiative, in collaboration with the Amenfi Central District Assembly has embarked on a number of activities aimed at sensitising members of these communities on the negative effects of child labour. The project was implemented with the help of Global Responses Initiative (a local NGO operating in the District). The 44 month project which begun in December 2010 will end in August 2014. So far, people in selected cocoa growing communities with prevalent worst forms of child labour have been provided with alternative sources of livelihood. Parents of children who were rescued from child labour were taught vocations such as soap making and bee keeping. Children rescued from child labour have also been provided with learning materials and have been put back to school.

1.5.17.3 People Living with Disability

Table 1.13 shows the population by type of locality, disability type and sex. It indicates that two percent of the total population (69, 014) of the district is disabled. Out of 1,364 disabled people in the district, 54 percent are males while 46 percent are females. This figure indicates that a relatively higher proportion of males in the district are disabled than the females.

1.5.17.4 Type of Disability

There are more people living with sight disability (530) than any other disability in the district. Among those with sight disability, the male population constitutes 40.4 percent while the female constitutes 37.1 percent. This is followed by physical disability (359). Again, there are less males (25.3%) with physical disability than their female counterparts (27.5%). Only a few people suffer from other forms of disability (7.7%), followed by emotional disability (13.1%).

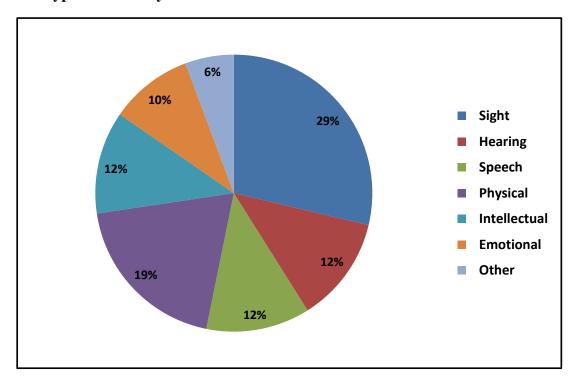

Figure 11: Type of Disability

Source: Ghana Statistical Service, 2010 Population and Housing Census.

Disability and Activity Status

Table 1.14 presents information on persons 15 years and older with disability by economic activity status in the Amenfi Central District. The district has a total disability population of 1,364, out of which 79.6 percent are 15 years and older. 60.2% of the disabled people (15 years and above) are employed, 1.3% are unemployed and 38.5% are economically not active. Those with sight disability are 460 with 66.5% employed, 1.7% unemployed and 31.7% economically not active. There are 296 physically disabled people with 46.1% employed and 53.7% economically not active. None (0.0%) of them is unemployed.

Among the male population, a total of 584 are disabled with 71.4% employed, 2.9% unemployed and 25.7% economically not active. Those with sight disability are 265 with 70.2% of them employed, 2.6% unemployed and 27.2% economically not active. A total of 149 physically disabled people were enumerated with 55.0% employed and 45% economically not active. None (0.0%) is unemployed.

There are 502 females who are disabled. 52.0% of them are employed, 47.6% are economically not active while none (0.0%) is unemployed. 195 of the females have sight disability with 61.5% of them employed and 37.9% economically not active. None (0.0%) of them is unemployed. Among the female physically disabled, 147 of them were enumerated, out of which 37.4% are employed and 62.6% are economically not active. None (0.0%) of them is unemployed.

The Table indicates that, among both sexes, there is no unemployed physically disabled person; either the person was employed or economically not active.

1.5.17.5 People Living with HIV/AIDS

A total of 1,796 people were tested for HIV/AIDS in the year 2013 in the Amenfi Central District. This was made up of 5 males (constituting 0.28%) and 1,791 females (constituting 99.72%). Out of this figure, 21 people tested positive (all females) while the rest tested negative.

1.6 Summary of Key Development Problems

The key developmental problems of the district as identified through the situational analysis undertaken bothers on the following.

Table 18. Summary of key Issues development issues of GSGDA II

Enhancing Competitiveness of	 performance review, profiling and community needs and aspirations) Poor and inadequate market structures

CHAPTER TWO

DEVELOPMENT PRIORITIES

2.1 Introduction

The District Development priorities were sampled out through community and Area Council level dialogue. This was to enable the communities identify and prioritize their needs. The decentralized departments also submitted inputs which have been factored into this plan. These priorities were grouped under five thematic areas of t namely:

- 1. Build a Prosperous Society
- 2. Create opportunities for all
- 3. Safeguard the natural environment and ensure a resilient built environment
- 4. Maintain a stable, united and safe society
- 5. Strengthening Ghana's role in international affairs

Table 20. Identified Development Issues under GSGDA II and NMTDPF, 2018-2021

GSGDA II, 2014-2017		NMTDPF		
GSGDA	11, 2014-2017	2018-2021		
THEMATIC AREAS	ISSUES	GOAL	ISSUES	
	Poor and inadequate market structures	Build a Prosperous Society	Limited access to credit by SMEs	
	Low access to micro credit			
Enhancing Competitiveness of Ghana's	Low Revenue Mobilization	Maintain a stable, united and safe society	Limited capacity and opportunities for revenue mobilization	
Private Sector	Inadequate technical and managerial skills	Build a Prosperous Society Limited number of skilled industria manpower		
	High level of unemployed youth	Create opportunities for all	Youth unemployment and underemployment among rural and urban youth	
Accelerated Agricultural	Low adaptation of improved Agriculture technologies	Build a Prosperous Society	Low application of technology especially among smallholder farmers leading to comparatively lower yields	
Modernization and Sustainable Natural Resource Management	Encroachment of forest reserves	Safeguard the natural environment and ensure a resilient built environment	Over exploitation and inefficient use of forest resources	
	Low livestock production	Build a Prosperous Society	Low productivity and poor handling of livestock/ poultry products	

	Land degradation due to illegal mining activities High incidence of bushfires	Safeguard the natural environment and ensure a resilient built environment	·Upsurge in illegal mining, otherwise known as "galamsey" Illegal farming and harvesting of plantation timber Forest fires disasters
	Inadequate knowledge on pesticide use	Build a Prosperous Society	Limited application of science and technology
	Weak water resource management	·	Increasing demand for household water supply
	Encroachment of forest reserves	Safeguard the natural environment and ensure a resilient built environment	Over exploitation and inefficient use of forest resources
	Pollution of water bodies due to illegal mining activities.	Build a Prosperous Society	Widespread pollution of surface water
	Inadequate access to electricity	Safeguard the natural environment and ensure a resilient	Difficulty in the extension of grid electricity to remote rural and isolated communities
	Poor road network in the district	built environment	Poor quality and inadequate road transport network
Infrastructure and Human Settlements	Inadequate communication network/ICT		Poor quality ICT services
	low access to portable water and sanitation facility	Build a Prosperous Society	Poor quality of drinking water ,Poor sanitation and waste management
	Low adaptation to Family Planning methods		Inadequate coverage of reproductive health and family planning services
	Low level of formal education	Build a Prosperous Society	low participation in Non-Formal education
	Inadequate trained teachers		High number of untrained teachers at the basic level
Warner -	Inadequate and poorly maintained school infrastructure	Safeguard the natural environment and ensure a resilient built environment	Poor and inadequate rural infrastructure and services
Human Development, Productivity and	Inadequate health facilities, equipment and logistics	Build a Prosperous Society	Huge gaps in geographical access to quality health care
Employment	Inadequate health staff	,	Inadequate and inequitable distribution of critical staff mix Inadequate capacity
	Inadequate furniture for schools	Safeguard the natural environment and ensure a resilient built environment	Poor and inadequate rural infrastructure and services
	High incidence of poverty	Build a Prosperous Society	Disparity in decline in poverty across the country and amongst different population groups

	Incidence of Child Labour		Poor implementation of policies and regulations on child labour's
	High presence of people living with HIV/AIDS (PLHIV)		Lack of comprehensive knowledge of HIV and AIDS/STIs, especially among the vulnerable groups
	Presence of persons Living with Disability (PWDs	Build a Prosperous Society	Weak implementation of legislation and policies on the Rights of Persons with Disability
	Ineffective Town and Area Councils	Maintain a stable,	Ineffective sub-district structures
Transparent,	Inadequate Office and Residential Accommodation	united and safe society	Poor and inadequate rural infrastructure and services
Responsive and Accountable Governance	Low level of women participation in decision making	Build a Prosperous Society	Unfavorable socio-cultural environment for gender equality
	Inadequate infrastructure and logistics for security services.	Maintain a stable, united and safe society	Inadequate and poor quality equipment and infrastructure

Table 21: Adopted Goals and Issues of SMTDP for the District

STRATEGIC GOALS	FOCUS AREAS OF MTDP 2018-2021	ADOPTED ISSUES
Build a Prosperous	Private sector development	Limited access to credit by SMEs
Society	Agriculture and rural development	Low application of technology especially among smallholder farmers leading to comparatively lower yields
	Agriculture and rural development	Low productivity and poor handling of livestock/ poultry products
	Industrial transformation	Limited number of skilled industrial manpower
		Limited application of science and technology
	Agriculture and rural development	
		Increasing demand for household water supply
	Water and sanitation	Widespread pollution of surface water
		Poor quality of drinking water ,Poor sanitation and waste management
	Population management	Inadequate coverage of reproductive health and family planning services
Create opportunities for all	Youth development	Youth unemployment and underemployment among rural and urban youth
	Education and training	High number of untrained teachers at the basic level
	Zavanon und truming	low participation in Non-Formal education

		Lack of comprehensive knowledge of HIV and AIDS/STIs, especially among the vulnerable groups
	Health and health services	Gaps in physical access to quality health care Inadequate and inequitable distribution of critical staff mix Inadequate capacity
	Poverty and inequality	Disparity in decline in poverty across the country and amongst different population groups
	Child and family welfare	Poor implementation of policies and regulations on child labour s on child labour
	Disability and development	Weak implementation of legislation and policies on the Rights of Persons with Disability
	Gender equality	Unfavorable socio-cultural environment for gender equality
Safeguard the natural	Information communication technology (ICT)	Poor quality ICT services
environment and ensure a resilient built environment	Deforestation, desertification and soil erosion	Over exploitation and inefficient use of forest resources
	Disaster management	Weak legal and policy frameworks for disaster prevention, preparedness and response
	Protected areas	Illegal farming and harvesting of plantation timber Forest fires disasters
	Mineral extraction	Upsurge in illegal mining, otherwise known as "galamsey"
	Rural development	Poor and inadequate rural infrastructure and services
	Energy and petroleum	Difficulty in the extension of grid electricity to remote rural and isolated communities
	Transport infrastructure: road, rail, water and air	Poor quality and inadequate road transport network
Maintain a stable, united and safe	local government and decentralization	Ineffective sub-district structures
society	Human security and public safety	Inadequate and poor quality equipment and infrastructure
Source DDCU 2017	Local government and decentralization	Limited capacity and opportunities for revenue mobilization

2.2 Application of Potentials, Opportunities, Constraints and Challenges (POCC) Analysis

The identified prioritised issues were further subjected to the analysis of the Potentials, Opportunities, Constraints and Challenges (POCC) of the District with respect to each of the Goal areas of the National Medium Term Development Policy framework (2018-2021). This is to help in the formulation of appropriate strategies and programmes to enable the District achieve its developmental goals. The "Potential" refers to available resources which when well utilised will enhance the development of the District. "Opportunities" refer to external factors which can be harnessed to positively influence the development of the District. "Constraints" on the other hand are weaknesses emanating from internal factors which the District has to minimize or eliminate to facilitate its development. "Challenges" are external factors or obstacles which the District has little or no control over and may hamper its development efforts. The tables below depict the POCC analysis of Amenfi Central District.

Table 22: Potential, Opportunities, Constraints and Challenges (POCC) Analysis

Central in collaboration with	the development	partners is working hard	to improve the mana	agerial and technical
skills of its entrepreneurs.	C	T1.1	T 1	T 1
High level of Untrained	-Committed	Favourable govt.	-Inadequate	-Inadequate govt.
Youth	Youth	Policy	logistics	funds
		-Presence of REP in		
	-Presence of	the district	-Inadequate youth	
	Vocational and	the district	training	
	Technical	-Presence of YEA	institution	
	School	Tresence of TETT	mstrution	
	2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	-Availability of fund		
		from GoG		
Conclusion: Achieving this	objective with the	available resource on ha	nd is the aim of Am	enfi Central. This is
done in conjunction with the	central governmen	t and the other developm	ent partners.	
Low access to micro credit	-Presence of	-Favourable govt.	-Cumbersome	-Misapplication of
	Rural banks	Policy such as YES	credit procedure	funds by the
				beneficiaries.

-Presence of NBSSI	-Inadequate from govern	
	-High inter on loans.	est rate

Conclusion: Achieving the goal of high entrepreneurial skills development cannot be possible without making micro credit accessible to the youth equipped with the entrepreneurial skills. DA is working in collaboration with the BAC and the financial institutions in the district to see to the achievement of this objection.

the BAC and the financial institutions in the district to see to the achievement of this objection.				
KEY ISSUE/ PROBLEM	POTENTIAL	OPPORTUNITIES	CONSTRAINT	CHALLENGES
Low adaptation of improved technologies Conclusion: The of things to improve to 2013.	the adaptation of mode	-Favourable govt. Policy Phieve the accelerated agricular technology with the avail	able potentials and oppo	- Poor Remuneration - Inadequate funds targeting among other ortunities by December,
Inadequate knowledge on pesticide use	-Committed Agric Extension Staff	-Favourable govt. policy -Presence of DDA in the	-Inadequate DDA staff in the District	-untimely release of funds
	-Committed farmers	District	- Inadequate logistics	-unavailability of pesticides in the market
		of farmers in the use of pest embarked on a District wide		
Low livestock production	-Committed Veterinary Officers -Committed Farmers	-Presence of DDA in the District	-Inadequate veterinary officers - Inadequate logistics	-untimely release of funds
Conclusion: The l	DA aims at improving	livestock production.		
Undeveloped Agro-processing Industry	-Availability of raw materials such as oil palm, cocoa husk etc. - Availability of some farming groups/ cooperative	-Presence of DDA in the District - Agro-processing equipment	-Inadequate capital from government. -Low income of farmers -Litigation and land tenure systems.	-High cost of processing equipment -Lack/inadequate venture capital firms in the district.
Conclusion : Agriculture in the District cannot be modernised without developing the agro-processing industries. The DA is liaising with agro-processing companies to set up branches in the District.				
Encroachment of forest reserves	-Presence of Forestry Commission	-Favourable government policies on forest reserves	-Presence of chainsaw operators	-Delay in prosecuting offenders

	-Presence of illegal	
-Committed DA	miners	
	-Inadequate staff	
	-Inadequate logistics	

Conclusion: The Amenfi Central District Assembly is working assiduously to flush out illegal chainsaw operators and miners in the District. This is aimed at preserving the natural resources and ensuring its sustainability.

KEY ISSUE/ PROBLEM	POTENTIAL	OPPORTUNITIES	CONSTRAINT	CHALLENGES
Land degradation due to illegal mining	-Presence of security agencies such as the District Police Command.	- Favourable government policies to arrest and prosecute illegal miners (galamsey operators)	- Lack of logistics - Poor access roads	- Delay in prosecuting offenders.
activities			-Lack of support from indigenes (some conspire and cover up foreign nationals)	-Loopholes at the country's borders which favour migration of foreigners.
		illegal mining activities are broutivities aimed at arresting and pro-		
High incidence of bushfires	-Presence of NADMO	-Favourable government policies which aims at prosecuting offenders.	- Inadequate logistics for NADMO officers. -Low level of education on the dangers of bushfire	-Delay in prosecuting offenders.
Conclusion: The	District office of NADI	MO has been undertaking perio		people on the dangers of

Conclusion: The District office of NADMO has been undertaking periodic education to sensitise people on the dangers of bushfires to life and property.

KEY ISSUE/ PROBLEM	POTENTIAL	OPPORTUNITIES	CONSTRAINT	CHALLENGES
Market Poor and inadequate market structures	- Presence of small scale and micro-enterprisesPresence of community markets	-Expected resources from Government and Donor Support such as DACF, DDF and royalties from Stool Lands ETC.	-Low Revenue Generation (IGF) -Low level of participation of the private sector, -The undulating nature of the land	- Untimely release of Development Grants -Unexpected deduction of the DACF Grants - Inadequate Donor support, DACF
Amenfi Central Distric		my and provide adequate and ssiduously to improve this obess).		*
Energy Inadequate access to energy	-Preparedness of the communities to provide self- initiative in the electrification process - Presence of ECG	-Government Commitment to SHEP - Presence of Rural Electrification Project in the district	-Inadequate funds -poor road net work -unavailability of permanent office structure for ECG	-lack of Sub-Station in the District - low income level of communities -Thick Vegetative and Forest cover
Conclusion : the DA set the development of the	0 1	percentage of communities to	the National Electricity (Grid which is very key to

Conclusion: It is the desire of the DA to provide adequate accommodation for its staff in order for them to be stable and work to champion the development of the district. However, the low IGF due to the district economy and the delay in release of the DACF has been some of the challenges confronting the Assembly.

CHAPTER THREE

THE DISTRICT GOALS, OBJECTIVES AND STRATEGIES

3.1 Introduction

The District Medium Term Development Plan (2018-2021) focuses on economic development, social service delivery and infrastructure development with particular emphasis on roads, education, health, sanitation and water supply. The MTDP also focuses on improvement of agricultural production and strengthening of the local economy with the ultimate objective of promoting growth and alleviating poverty.

3.2 National Medium-Term Development Policy Fframework

The vision of Ghana as contained in the long-term national development policy framework (LTNDPF, 2018-2057) is a "just, free, and prosperous nation with high levels of national income and broad based social development". The vision is to be accomplished through the formulation and implementation of ten 4-year medium-term development plans (MTDPs).

The goals of National Medium-Term Development Policy Framework (2018-2021), is to Build an inclusive industrialised and resilient economy, Create an equitable, healthy and disciplined society, Build safe and well planned communities while protecting the natural environment, Build effective efficient and dynamic institutions and Strengthen Ghana's role in international affairs aimed at achieving the Millennium Development Goals and sustaining its lower middle income status.

3.3 District Medium Term Development Goal

The overall goal of the District Medium Term Development Plan is to "improve the quality of life of the people in the District through socio-economic infrastructure, transparency and accountable governance".

3.4 Development Objectives

The development objectives and strategies have been formulated in order to achieve the set Goal of the District Medium Term Development Plan (2018-2021). The objectives are stated under four (4) of the five (5) goals namely;

1. Build an inclusive industrialised and resilient economy

- 2. Create an equitable, healthy and disciplined society,
- 3. Build safe and well planned communities while protecting the natural environment,
- 4. Build effective efficient and dynamic institutions

Table 23: Adopted Objective and Strategies for the District

ADOPTED OBJECTIVES	ADOPTED STRATEGIES	PROGRAMME S	SUB- PROGRAMMES
Enhance Domestic Trade	Develop modern markets and retail infrastructure in every district to enhance domestic trade	MANAGEMENT	FINANCE & REV MOBILISATION
Improve efficiency and competitiveness of SMEs	Mobilize resources from existing financial and technical sources to support MSMEs	AND ADMINISTRATION	HUMAN RESOURCES MGT.
Improve production efficiency and yield	Ensure effective implementation of the yield improvement programme		
Promote livestock and poultry development for	1.Strengthen research into large scale breeding and production of livestock across the country		
food security and income generation	2.Strengthen existing training facilities and establish additional ones in animal health	ECONOMIC	AGRIC DEVPT.
Ensure improved skills development for Industry	Establish apprenticeship and skills development centers to train skilled labour force for specific industrial sectors	DEVELOPMENT	
Enhance the application of science, technology and innovation	Improve the effectiveness of Research-Extension- Farmer Liaison Committees (RELCs) and integrate the concept into the agriculture research system to increase participation of end users in technology development		
Improve access to safe and reliable water supply services for all	Provide mechanized borehole and small town water systems	INFRASTRUCTURA L DELEIVERY AND MANAGEMENT	INFRASTRUCTURAL DEVPT.
Promote sustainable water resource development and management	Undertake tree planting along the banks of all major water bodies and their tributaries to reduce silting and pollution from human activities		
Improve access to improved and reliable	Create space for private sector participation in the provision of sanitation services	ENVIRONMENTAL & SANITATIONAL MGT.	DISASTER PREV. & MGT.
environmental sanitation services	Provide public education on solid waste management		
	Review, gazette and enforce MMDAs' bye-laws on sanitation		

Improve population management	Improve maternal and adolescent reproductive health Strengthen the integration of family planning and nutrition education into adolescent reproductive	SOCIAL SERVICES DELIVERY	SOC. WELF. & COM. DEVPT.
Promote effective participation of the youth in	Build integrated youth centers in all districts to serve as an information hub for youth development		
socioeconomic development	Improve quality and access to post basic education skills training		
Enhance inclusive and equitable	Expand infrastructure and facilities at all levels		EDUCATION AND YOUTH DEVPT.
access to, and participation in quality education at all levels	Popularize and demystify the teaching and learning of science, technology, engineering and mathematics (STEM) and ICT education in basic and secondary education		
Ensure the reduction of new HIV and	Intensify behavioral change strategies especially for high risk groups for HIV & AIDS and TB		
AIDS/STIs infections, especially among the vulnerable groups	Strengthen collaboration among HIV & AIDs, TB, and sexual and reproductive health programmes		
Ensure affordable, equitable, easily	Expand and equip health facilities		HEALTH DELIVERY
accessible and Universal Health Coverage (UHC)	Accelerate implementation of the mental health strategy	SOCIAL SERVICES DELIVERY	
Coverage (OTIC)	Strengthen the district and sub-district health systems as the bed-rock of the national primary health care strategy		
Eradicate poverty in all its forms and dimensions	Empower the vulnerable to access basic necessities of life		
Ensure the rights and entitlements of children	Introduce District Integrated social services programme for children, families and vulnerable adults		
Promote full participation of PWDs in social and economic development of the country	Ensure effective implementation of the 3 percent increase in District Assemblies Common Fund disbursements to PWDs		SOC. WELF. & COM. DEVPT.
Attain gender equality and equity in political, social and economic development systems and outcomes	Target attainment of gender balance on all government- appointed committees, boards and other relevant official bodies		
Enhance application of ICT in national development	Improve telecommunications accessibility	INFRASTRUCTURA L DELEIVERY AND MANAGEMENT	INFRASTRUCTURAL DEVPT.

Combat deforestation, desertification and Soil erosion	Promote and develop mechanisms for transparent governance, equity sharing and stakeholder participation in the forest, wildlife and wood fuel resource management (e.g. CREMAs).		
	Ensure enforcement of National Wildfire Management Policy and local level bye-laws on wildfire		
Protect existing	Strengthen involvement of local communities in the management of forests and wetlands through mechanisms such as co-management systems		
forest reserves	Enhance capacity of MDAs and MMDAs to mainstream biodiversity into development planning and budgeting processes	ENVIRONMENTAL & SANITATIONAL MGT.	DISASTER PREV. & MGT.
Weak legal and policy frameworks for disaster prevention, preparedness and response	Educate public and private institutions on natural and man-made hazards and disaster risk reduction 2. Strengthen early warning and response mechanism on disasters		
Ensure sustainable	Ensure mining and logging activities are undertaken in an environmentally sustainable manner		
extraction of mineral resources	Improve technical capacity of small scale miners to enhance efficiency and sustainability in their operations		
Enhance quality of life in rural areas	Provide basic infrastructure such as potable water, sanitation, electricity, road networks, schools, health facilities, low-cost housing		
	Promote rural enterprise development, financial inclusion, service delivery, capacity building and local economic development		
Ensure efficient transmission and distribution system	Expand the distribution and transmission networks	INFRASTRUCTURA L DELEIVERY AND	INFRASTRUCTURAL DEVPT.
distribution system	Revise self-help-electricity project and use means- testing approaches to enable the poor to connect to the national grid	MANAGEMENT	BBVI I.
Improve efficiency and effectiveness of road transport infrastructure and services	Provide bitumen surface for road networks in district capitals and areas of high agricultural production and tourism		
Deepen political and administrative decentralization	Strengthen sub-district structures		GENERAL ADMINISTRATION
Enhance security service delivery	Transform security services into a world class security institution with modern infrastructure, including accommodation, health and training infrastructure	MANAGEMENT AND ADMINISTRATION	PLANNING, BUDGET & COORD.
Strengthen fiscal decentralization	Enhance revenue mobilization capacity and capability of MMDAs		FINANCE & REV
	Strengthen PPPs in IGF mobilization		MOBILISATION

CHAPTER SIX

IMPLEMENTATION, MONITORING AND EVALUATION

6.0 Introduction

Implementation of the District Medium Term Development Plan (2018-2021) requires monitoring and evaluation of programs, projects and activities captured in the plan. Monitoring is defined broadly as the regular collection and analysis of information to assist timely decision making, ensure accountability and provide the basis for evaluation and learning. It is also a continuing function that uses methodical collection of data to provide management and the main stakeholders of an ongoing project or programme with early indication of progress and achievement of objectives.

Evaluation on the other hand is defined as a systematic examination of a planned, ongoing or completed project it aims to answer specific management questions and to judge the overall value of an endeavour and supply learned to improve future actions, planning and decision making. The above definition provides the bed rock up which the monitoring and evaluation plan is for the DMTDP will be farmed.

Monitoring and evaluation of the District Medium Term Plan and reporting shows the extent made toward the progress of the implementation of the policy document. This will also help in the assessment of developmental targets and objectives and identify achievement and constraint so that improvement can be made to achieve a better impact.

6.1 Purpose of the Monitoring and Evaluation

Monitoring and evaluation can be continually improved through informed decision making, leading to social and economic transformation to improve the standards of living in the district. Recognizing the fact that, resources are limited and the demand for results-based M&E has grown rapidly in recent times. Emphases are now being placed on public sector transparency and accountability for effective services delivery. M&E in the country has therefore shifted from being

implementation based (concerned with the implementation. of activities) to being results-based (assessing if real changes have occurred). The purpose of M &E includes:

- Assess the MTDP developmental targets are being met.
- Identify achievements, constraints and failures so that improvements can be made to the MTDP and project designs to achieve better impact.
- Identify the appropriate interventions that will increase the responsiveness of targeted beneficiaries
- Provide information for effective coordination of district development at the regional level.
- Provide district authorities, the government, development partners, community project
 management teams and the general public with better means for learning from past
 experience.
- Improve service delivery and influence allocation of resources in the districts and demonstrate results as part of accountability and transparency to Ghanaians and other stakeholders.
- Demonstrate result to stakeholders as part of accountability and transparency.

6.2 Stakeholder Analysis

Stakeholder analysis is an integral part of the planning process where various stakeholders are identified in the District. The stakeholders are all the organizations and groups of people involve in issues and strategies connected to development. This is relevant in the sense that, the identification and participation of these stakeholders will lead to sustained capacity building, dissemination and demand for Monitoring and Evaluation results. In doing this, all the stakeholders were identified and analysed with a critical look at their background information and their various roles, needs and responsibilities.

Table 30: Analysis of Stakeholders

No.	Stakeholders	classification	Roles and Responsibilities	Involvement
1.	MLGRDE /	Primary	Provision of guidelines for planning, Monitoring and	M & E plan Preparation
	NDPC other		Evaluation and Budgeting	Monitoring & Evaluation of Das
	Extra-		Mediates on the DAs behalf with Donors	M & E results dissemination
	Ministerial		Monitors and coordinates Das Programmes	
	Institutions		Support capacity building programmes	
	(e.g. GAC)		Formulates policies	
2.	Office of the	Primary	Receives and disburses at least 5% of the Consolidated fund	Mid-term M&E
	Administrator		to Sub-national structures	Organise Development evaluation
	of DACF		Monitors DAs Programmes	
3.	Regional	Primary	Policy Planning	Field visit, Progress reports, Workshops, Seminars
	Coordinating		Development coordination among districts in the Region	
	Council		Harmonization of DMTDP	
	(R.C.C.)		Supervision of administration of the DAs	
			Monitoring and Evaluation of projects	
4.	District	Primary	Policy formulation	M& E plan Preparation
	Administration		Development Planning and budgeting	M &E Seminars & meetings
			Make laws	Supervision and inspection of projects /programmes
			Direct implementation	M & E results reporting and dissemination
			Provision of key personnel for monitoring	
			Coordinates the activities of Decentralized Departments	
			Revenue mobilization	
5.	Area Council	Primary	Champion the needs of electorates (Area Councils)	Data Collection
	Members		Coordinates unit committees in their Zones	Dissemination of information
			Revenue mobilization	Monitoring and evaluation of projects and
			Initiate and monitor projects	programmes
6.	Unit	Primary	Champion the needs of electorates/ units (communities)	Data Collection
	Committee		Revenue mobilization	Dissemination of information

	/Local		Initiate and monitor projects	Monitoring and evaluation of projects and
	Communities	- ·	Collect data	programmes
7.	District Health	Primary	Providers of curative and public health services	Data Collection
	Administration		Monitor and supervise services provided	Dissemination of information
	and Service		Collection, collation and analysis of data	Reporting
	Providers		Play roles as members of district monitoring team	
8.	District	Primary	Provision of veterinary services	Data Collection
	Agriculture		Crop protection services	Dissemination of information
	Dept.		Monitor and supervise services provided	Reporting
			Collection, collation and analysis of data	
			Play roles as members of district monitoring team	
			Provide extension services	
			Ensures food security	
9.	GES and	Primary	Provision of quality education	Data Collection
	private		Monitoring, Evaluation and Supervision of schools	Dissemination of information
	providers		Schools children as key disseminators of information	Reporting
			Collection, collation and analysis of data	
10.	Other	Primary	Implementing government policy at the local level	Data Collection
	Departments		Provision of social, economic, security, legal and other	Dissemination of information
			services	Reporting
			Provision of adult education	
11.	MP	Primary	To brief constituents on activities in parliament	M &E Seminars & meetings
			Decision making	Supervision and inspection of projects /programmes
			Collates the concerns of the people for parliament and	M & E results reporting and dissemination
			higher authority	
			Monitors development	
			Lobbies for development programmes	
12.	Political	Primary	Acts pressure groups	Dissemination of information
	Parties	•	Evaluate the performance of government	Evaluation of projects and programmes

13.	Development partners	Secondary	Act as donors for various projects Initiate and monitor projects Provide employment Provide social infrastructure for health, education and others	Monitoring and evaluation of projects and programmes Reporting
14.	Media	Secondary	Transparency and Accountability Information to the public Means of collecting information	Projects inspections Dissemination and communication of M & E results
15.	Civil Society Groups (NGOs, FBOs, CBOs)	Secondary	Information dissemination Act as advocates Initiate projects Collect and provide data and other information Demand accountability and transparency	Capacity building for M&E staff Data Collection Monitoring and evaluation of projects and programmes Dissemination of information
16.	Traditional Authority	Primary	Influence decision making Initiate development projects Lobby for projects Influence the political systems Custodians of land	Durbar, Meetings

6.3 Monitoring and Evaluation Matrix

The matrix which is an important component in every M&E plan provides a format for

presenting the inputs, outputs, outcomes, and impacts (and their corresponding activities)

for each DMTDP objective. It provides a summary of the overall monitoring and

evaluation and a list of methods to be used in collecting the data.

Below shows the matrix for the District M&E.

Table 31: Monitoring and Evaluation Matrix

183

Indicators	Indicator Definition	Indicator Type	Base line	2018	2019	2020	2021	Disaggregati on	Monitorin g Frequency	Responsibility
			2017						Trequency	
Goal: Create op	_

6.4 M & E Work Plan and Calendar

6.4.1 M & E Work Plan

The M & E work plan is to guide the implementation of the district medium term plan. It contains all the programmes envisaged for the four year planned period of a policy or intervention. It assigns responsibilities, timeframes and cost of all the activities identified. Details of the M&E work plan for Amenfi Central District (2018-2021) as indicated below.

Table 32: M & E Work Plan 2018 - 2021

M & E ACTIVITIES	TIMELINE	ACTORS	BUDGET	
	2018 – 2021		GH¢	
M& E PLAN PREPARATION			T	
Review and selection of	Every 4 th Quarter	DPCU	8,000.00	
indicators

6.5 Data Collection

Data collection is an integral part of M&E implementation in the district. It is in this regard that, the DPCU would collect and collate data (primary and secondary) on all activities in the district that are aimed at achieving the objectives set out in the District Medium-Term Development Plan (DMTDP). This would include a register which contains all on-going programmes and projects undertaken under the auspices of the Assembly as well as Development Partners and NGOs in operating in the district. This register would be regularly updated with details on each activity such as start-time, costs, location, and source of funding, expected completion date, and status of project, among others. The data collection will be in form field visits and focus group discussion at the local levels.

6.6 M&E Information System

The Assembly would put in place well-functioning IT-based monitoring information to effectively and efficiently enter data and assess the success and impact of the implementation of the plan and provide evidence for people within and outside the District. The Assembly would also make use of available systems and computer software like the Ghana Info, which was launched by the Ghana Statistical Service (GSS) in collaboration with NDPC in its Monitoring and Evaluation activities.

6.7 Data Analysis

The District Planning Coordinating Unit (DPCU) will endeavour to collate all M&E data in respect of the various activities as outlined in the District Medium Term development Plan.

DPCU secretariat will as much as possible analysis the M&E data collated and intemperate it to reflect the key development priorities of the people in the district. Data gathered will be on education, health, agriculture, water and sanitation, the environment, poverty etc. The data shall be updated regularly, based on the nature of the date cost implications. Since the core business of the analysis is to report on the progress of each indicator towards the meeting of the goal, objectives and targets of the DMTDP and the GSGDA II. DPCU

will ensure that, the data is analysed in a systematic manner so that lessons learned would be passed over to subsequent district action plans and DMTDP.

The data analysed will indicate result of each programme or projects implemented in the district. Example, commencement and completion periods of projects and programmes will critically be assessed to determine whether resources are being used judiciously to the benefits of the citizenry. The results will prescribe appropriate methods for addressing any lapses identified.

Appropriately, the data results collated in a form of a report will be sent to RPCU, NDPC and district stakeholders.

6.8 Participatory M&E

DPCU will as much as possible encourage participatory M&E. Stakeholder to be involved in this critical tool will include traditional rulers, NGOs/CBOs, Unit committee members, Decentralised Departments and the Area Councils.

This process will facilitate the revelation of community views on whether the interventions have achieved its desired objectives among the poor and the vulnerable in the district.

There will be vigorous public education to create awareness among beneficiaries to participate in the assessment of programme and project indicators.

The DPCU will further promoted partnership t through participatory M&E between the district Assemblies, Communities and Civil society organizations.

Capacity building programmes or training workshops will be organized for district stakeholders to strengthen their skills in participatory M&E. Roles and responsibilities in participatory M&E would be critically discussed by stakeholders

6.9 Reporting

After each monitoring exercise, project actors, communities, sub-district and sector department and civil society organization will be made aware of the keyed progress of work, observations/findings including issues requiring addressed at the project site.

On return from monitoring assignments, the DPCU shall hold a meeting to brief the District Chief Executive, Presiding member and other DA members on progress of work, observations and gaps identified.

There shall be two forms off reporting on the operations of the DPCU. The first shall involve routine activities in which the DPO will document the outcome of operations in the form of minutes and report for the attention off the DCE. This report will cover meetings, working and review sessions and monitoring of projects and programmes among other.

The other reporting shall be produced quarterly and annually and it shall be distributed to DCD, Presiding Member, Area Council, Regional Coordinating Council, Ministry of Local government Rural Development and Environment and the NDPC. The report shall include all the findings and reactions.

The reporting outline shall consist of the following:

- Introduction
 - Purpose of the M&E f for the stated period
 - Process involved and constraint encountered
 - Status of implementation of DMTDP

- M&E Activities Report

- Programme/project status for the quarter or year
- Update on disbursements from finding sources
- Update on indicators and Targets
- Update on critical development and poverty issues participatory M&E
- Participatory M&E

- The Way Forward

- Key issue addressed and those yet to be addressed
- Recommendations.

6.10 Dissemination Strategy

The M&E reports will be disseminated to relevant stakeholders and decision-makers. Copies of the APR and quarterly reports would be forwarded to the RPCU, NDPC and other MDAs and stakeholders. The content of these reports would be shared with stakeholders at the sub-district and community. This will increase the accountability and transparency of the Assembly as well as displaying commitment to development. Again, it will boost the commitment of the stakeholders to support development interventions that emerge from the M&E exercise. Dissemination strategy would be prepared and adopted by the DPCU for the purpose of communicating the reports contents to a wide-range of stakeholders. The strategy will include the following:

- Announcement at community information centres
- Sensitization at community durbars
- Meeting with traditional rulers/opinion leaders Area Councils and representatives of unit Committees.
- Meeting with civil Society organization in the district.
